

Practice B

For use with pages 109–116

Use the diagram to decide whether the statement is *true* or *false*.

1. If $m\angle 5 = 42^\circ$, then $m\angle 6 = 48^\circ$.
2. If $m\angle 5 = 42^\circ$, then $m\angle 7 = 42^\circ$.
3. $m\angle 5 + m\angle 7 = m\angle 6 + m\angle 8$
4. $m\angle 5 + m\angle 8 = m\angle 6 + m\angle 7$

Make a sketch of the given information. Label all angles which can be determined.

5. Adjacent complementary angles where one angle measures 42°
6. Nonadjacent supplementary angles where one angle measures 42°
7. A linear pair of congruent angles
8. Vertical angles which measure 42°

Solve for x .

12. Give a reason for each step of the proof.

Given: $\angle 1$ and $\angle 2$ are complementary.
 $\angle 1 \cong \angle 3$, $\angle 2 \cong \angle 4$

Prove: $\angle 3$ and $\angle 4$ are complementary.

Statements

1. $\angle 1$ and $\angle 2$ are complementary.
2. $m\angle 1 + m\angle 2 = 90^\circ$
3. $\angle 1 \cong \angle 3$, $\angle 2 \cong \angle 4$
4. $m\angle 1 = m\angle 3$, $m\angle 2 = m\angle 4$
5. $m\angle 3 + m\angle 2 = 90^\circ$
6. $m\angle 3 + m\angle 4 = 90^\circ$
7. $\angle 3$ and $\angle 4$ are complementary.

Reasons

1. Given
2. ?
3. Given
4. ?
5. ?
6. ?
7. ?

13. Write a two-column proof.

Given: $\angle 2 \cong \angle 3$

Prove: $\angle 1 \cong \angle 4$
